

## Uniscon @ Cloud Expo Europe: Sealed Platform: Digitization without regrets

*At Cloud Expo Europe, Munich-based TÜV SÜD subsidiary Uniscon is presenting their Sealed Platform for the international market. With this high-security cloud platform, organizations can run business-critical applications – and still meet their compliance requirements.*

**12.03.2019 – Munich:** Hygiene and the cloud – what do they have to do with each other? Actually a lot, since hygiene regulations in industrial kitchens are controlled digitally: The collected data is sent to Uniscons Sealed Platform via professional IoT modules from WAGO – thus protecting the data against manipulation. In addition, this secures the employee's profiles, because under no circumstances may they reach other employers. This is important to the works council and the management. The documentation and evaluation of any measured values are finally automated via an app –time-saving, forgery-proof and compliant with data protection. This is just one example of how companies can use the Sealed Platform.

### "Privacy by Design" for all industries

Uniscons Sealed Platform prevents unauthorized access to apps and data in all industries and sectors with just a set of technical measures. Even privileged access is excluded. Karl Altmann, CEO of Uniscon, explains: "All data is reliably protected during processing, storage and transmission – even against possible insider attacks by the platform provider or administrators." This is due to Uniscons consistent privacy-by-design approach: "Right from the start, we incorporated most modern data protection and IT security principles into the concept," says Altmann. For that reason, the Sealed Platform manages to achieve a truly unique level of security.

Uniscons proprietary cloud platform is available as a private, hybrid or public cloud and is suitable for all types of applications. Thus, target users are companies with own data centers or clouds, platform and telco providers as well as independent software vendors.

### Visit us!

You want to know what our Sealed Platform can do for your business? Visit us on site at ExCel London: We will be there for you Tuesday, March 12th and Wednesday, March 13th 2019. Find us at our joint booth with TÜV SÜD (N12 | S4341).

Do not miss the presentation of Karl Altmann, CEO of Uniscon, on Tuesday, March 12th. Based on specific use cases, Altmann explains what to consider when security-critical business data and applications migrate to the cloud:

**Title:** "Ultra-high security for business critical data and applications in the cloud"

**When:** March 12 from 2:30 to 2:45 pm

**Where:** Cloud Security Innovations Strategies & Service Providers Theater
