

## Uniscon @ Cloud Expo Singapore: Enabling the digital transformation

**September 17, 2019 — Munich.** Has your company embarked on a process of digitalization? The combination of cloud technology and digital security is the key to realizing digital transformation. It's not just about using modern technology, it's also about the legally compliant use of data, which can be of great value to businesses.

### Sealed Platform — A highly secure basis for digitalization

The TÜV SÜD subsidiary Uniscon GmbH will present itself to the Asian market at **Cloud & Cyber Security Expo in Singapore**. From October 9 to 10, the cloud security experts will be presenting the Sealed Platform technology as a trailblazer for a successful digital transformation (**Booth: G64**).

Jörg Horn, Global Head of Business Development at Uniscon, will explain in his presentation “Ultra-secure cloud as enabler for digital transformation” how the Sealed Platform’s unique Zero Privileged Access Architecture protects data and applications in the cloud against unauthorized access, including concrete application examples from the industry.

### **Jörg Horn (Uniscon GmbH): "Ultra-secure cloud as an enabler for digital transformation"**

**When: On Wednesday, October 9 at 11:30 am**

**Where: The Future of Cyber Security Theatre**

"The highly secure cloud platform provides the ideal basis for all types of IoT, M2M and SaaS services and applications," says Jörg Horn. "It protects sensitive information and helps companies develop new digital business models."
