Uniscon at it-sa 2019 in Nuremberg

September 30, 2019. Munich. it-sa is Europe's leading trade fair for IT security and it will take place again from October 8-10 in Nuremberg. Uniscon GmbH—a provider of highly secure cloud solutions for legally-compliant data exchange and part of the TÜV-SÜD Group since 2017—will be there. This year, Uniscon cloud security experts will be focusing on the Sealed Platform, which uses patented technology to meet the highest security standards. In addition, their stand will all revolve around international market expansion.

Highly secure cloud platform for data and applications

Considering that digital data may contain highly sensitive information, the Sealed Platform meets strict data protection and IT security requirements. The solution is based on the patented Sealed Cloud technology, which uses purely technical measures to ensure that information is encrypted when transferred, processed and stored. With the Zero-Privileged-Access architecture, users can be sure that only authorized persons access the data. Even privileged access from the data center or the administrator is technically impossible. The Sealed Cloud platform is therefore well-suited for particularly security-critical applications in the field of SaaS, IoT and M2M.

"Many companies still have doubts about whether sensitive applications in the cloud can be stored in compliance with the EU General Data Protection Regulation (GDPR). With the Sealed Platform we guarantee highly secure data traffic and applications operation with the highest demands on IT security", explains Dr. Hubert Jäger, CTO of Uniscon.

Security for digital financial services and applications

In his presentation "Master the challenges of regtech-compliance with zero-knowledge cloud technology", Dr. Jäger will explain how the Sealed Platform works in conjunction with RegTech—a technology that helps financial services providers comply with regulatory requirements. Using use cases, he will show how the Sealed Cloud technology is used as the basis for RegTech solutions in the banking and insurance sectors while meeting compliance requirements.

- **When: On October 9 at 10:40 am**
- **Where: in the International Forum 10.1**

The Uniscon team is looking forward to interesting discussions **at the joint booth with TÜV-SÜD AG in hall 9, 9-109**.
