Mission Possible: uniscon presents highly secure cloud services at Cloud Expo in London

February 14, 2020 – Munich. Will 2020 be the year of the IoT? The Swiss business association Swico has followed the most important global technology trends in the third edition of its "House View" report. All industries seem to agree on one thing: The global trend leader is the Internet of Things (IoT)[1]. In fact, global sales in this area are expected to reach over $800 billion this year.

However, companies still face complex challenges when implementing IoT projects. According to experts, IT security concerns represent one of the biggest obstacles.[2]

The Munich-based TÜV SÜD subsidiary uniscon now wants to address these concerns: At the Cloud Expo Europe in London on March 11 and 12, 2020, the IT security specialists will be exhibiting and presenting their highly secure cloud Business solutions.

How does the cloud protect data and applications?

uniscon's sealed platform®, a cloud platform with a uniquely high level of security, protects both data and applications of all industries and sectors with a variety of technical measures that prevent unauthorized access. uniscon CEO Karl Altmann explains: "All data is reliably protected during processing, storage and transmission—also against possible insider attacks due to the abuse of privileged access."

The operator-safe sealed platform® is available as a private or public cloud and is suitable for all types of applications in which safety-critical data is collected, transmitted or processed. Potential users include companies with their own data center or cloud, as well as platform, telco and fintech providers, and independent software vendors.

Come and meet us!

Visit us on **March 11th and 12th, 2020** at **ExCel London** (**booth C1316**) to learn more

Jörg Horn, Global Head of Business Development, present how uniscon's cloud solutions help companies meet regulatory requirements and reduce cloud risks.

> **Title:** "Beyond data encryption. How uniscon's sealed platform® for confidential cloud computing helps organizations ensure regulatory compliance and mitigate cloud computing risks."
> **When:** March 11th, 12:35 p.m.
> **Where:** Data protection, encryption and privacy stream

You can find more information about our presence at Cloud Expo Europe here.
